# Traffic Transmission

Due to the use of a new and simple principle, this nowfamous unit does away with all the shortcomings that stamp the sliding gear transmission as the most backward part of the otherwise up-to-date automobile of today.

### **Gears Cannot Clack**

All its amazing advantages can be told in a single sentence: You rannot clash the gears.

You can change from high to second to low, or from low to second to high under all conditions—without noise or failure.

### **Down Hills Safely**

You can descend mountain-steep grades without riding the brake; for a split-second snap puts you into second gear or low and the motor breaks the car.

The same certain, silent action eliminates fully 75% of the nervous tension in traffic driving.

### How You Do It

With all these new results, there is nothing new to learn. You use the clutch and move the gear lever exactly as before. This is one of the reasons why the Traffic Transmission ranks as one of the really great advances in automotive engineering.

Pikes Peak Motor Superb New Bedies

Besides the Traffic Transmission, the 1925 Chandler has many other notable features: The Pikes Peak Motor, full balloon tires as standard equipment, an indestructible rear axle, 4-wheel brakes optional at a slight extra cost, and Fisher bodies of rich and striking beauty.

The New Metropolitan Sedan De Luxe and the new Chutuary Sedan in Luxor blue and black are the handromest bodies that ever graced a famous chassis.

### Sheiff's Nephew Injured.

Edward Lathan of Lercy, the young man who was injured, and his two companions, both young men, were killed last week when an Eric freight train truck the truck in which they were riding, proves to be, as was thought here at the time, the nephew of Sheriff Arbuckle. Word has since been received by Sheriff Arbuckle direct from the Lathan family, saying that Edward's injuries are not serious. His escape was a most fortunate, almost miraculous, one.
